

Good morning/afternoon Sir/Madam,

It's my pleasure to be interviewing with you. I am Farooq ahamed. I belong to Tamilnadu. I have been living in Namakkal for 18 years. Now I am residing in Tiruchengode with my family. Besides my parents, there is an elder sister in my family. I completed My higher studies in 2021 at SPK Gems and doing my Bachelor of information science and engineering at Bannari Amman institute of technology. Currently, I am exploring job opportunities in full-stack development.

I am very interested in computer programing and software. That was why I chose to pursue higher studies in the backend. Post that, my internship experience and other practical projects in the college further boosted my interest in software as a full-time career option.

I am passionate about the field I graduated in computer science, and I am also inclined toward creative activities such as dancing, painting, acting, etc. I have always been an active student in school and college. I have participated in many cultural events during my school and college days and have won many awards.

I enjoy going out with friends and trying new cuisines in my free time. I also enjoy watching movies, listening to music, reading, working out, and going on road trips.

I am looking forward to knowing more about this opportunity.
